

Redeem your QRD Pro code

Someone gave you a code like `QRD-PRO-XXXXXXX` ? Here's how to turn on your Pro plan — no credit card needed.

Steps

1. **Sign in** to QRD (or create an account) at your QRD site.
2. Make sure you're in the **organization** you want to upgrade (switch orgs from the account menu if you have more than one).
3. Go to **Billing** in the left menu.
4. In the "**Have a code?**" box, paste your code and click **Redeem**.
5. That's it — your organization is instantly upgraded to **Pro**. You'll see the plan badge update and all Pro features unlock.

What you get on Pro

- Unlimited QR codes
- Dynamic (editable, trackable) QR codes
- Advanced analytics
- Unlimited API keys (REST API + MCP)
- Custom branding
- Scheduled email reports

Good to know

- **One code, one organization.** Each code works a single time. Once redeemed it can't be reused.
- **Only an organization owner can redeem a code.** If you don't see the "Have a code?" box, ask your workspace owner to redeem it, or make sure you're on the Free plan (the box is hidden once you're already on a paid plan).
- **No card, no charge.** A redeemed code does not create a Stripe subscription — you won't be billed.
- **Trouble?** If the code says it's invalid or already used, double-check for typos (codes never contain the letters O/I or the numbers 0/1) and confirm with whoever sent it to you.
